

DREW JOHNSON

☎ 4048252866 ✉ DrewJohnsonGT@gmail.com 🔗 drewj.dev 📍 Atlanta, GA

SUMMARY

Software Engineer with an aptitude for problem-solving and a passion for learning. Proven ability to leverage extensive knowledge of the web and software development/engineering best practices to develop maintainable and scalable applications. Experience leading both individual and team full cycle software projects.

EXPERIENCE

Full Stack JavaScript Developer (Contract)

Schenck Process 📅 10/2018 - 04/2019 📍 Remote

- ReactJS/Redux, Node.js, MSSQL, IIS
- Developed internal sizing tool for engineering/sales teams to configure explosion vent products and generate reporting information
- Led discovery, design, development, testing, and deployment of application

Software Engineer - Big Data

Delta Airlines 📅 09/2019 - Ongoing 📍 Atlanta, GA

- Java, Scala, Hadoop, Hbase, Hive, Kafka, AWS, Cucumber
- Developed Big Data streaming applications for consolidation of mass customer data around centralized IDs
- Automated testing of API endpoints and intermediate data pipeline validation
- Developed and managed Spark/Scala jobs and ran intermediate Hbase/Hive queries
- Assisted full lift and shift migration to AWS - Lambda, MSK, EMR, EC2

Lead Software Developer

Meridian Business Services 📅 10/2017 - Ongoing

📍 Overland Park, KS

- Lead developer on over a dozen full-scale NetSuite implementations as well as another two dozen partial implementations/projects
- Worked directly with a team of engineers to facilitate advanced customization
- Developed multiple NetSuite 3rd party Javascript integrations including Box, Google Maps, and Google Cloud Storage
- Developed multiple internal tools and CI/CD processes to facilitate development life cycle

Software Developer (Contract)

Federal Aviation Administration 📅 03/2018 - 12/2018 📍 Remote

- ReactJS/Redux, Firebase
- Designed and Developed room scheduling progressive web application
- Implemented role-based access functionalities and user-based customization

Application Software Developer (Contract)

DSI Global 📅 12/2017 - 12/2018 📍 Kansas City, MO

- Developed NetSuite based ReactJS/Redux applications for warehouse inventory management solutions
- Suggested and led implementation of React/Redux in new production applications as well as conversion of older products
- Implemented continuous integration pipeline with multiple intermediate environments and automated testing

SKILLS

JavaScript (ES6+)

Node.js

ReactJS

Redux

TypeScript

SQL

GraphQL

HTML5/CSS3

AWS

Firebase

EDUCATION

B.S. in Computer Science

Georgia Institute of Technology

📅 2013 - 2017

- Threads - Artificial Intelligence and Modeling/Simulation

SIDE PROJECTS

NetSuite Chrome Extension

📅 11/2018 - 01/2019

Chrome extension to facilitate use of shared client NetSuite accounts by implementation engineers by providing and tracking access (React, Firebase, Material-UI)

Sweet SuiteScript

📅 02/2019 - Ongoing

Static informational site and blog providing information on NetSuite (SuiteScript 1.0/2.0) development (React, Gatsby)

Jefferey (Robotics)

📅 2017 - Ongoing

Hardware software interface practice project. Multiple integrated hardware systems, including visual input, with a WebRTC based controller. (UDOO, Arduino, C/C++, Python)

Project FORM

📅 11/2019 - Ongoing

Native (iOS/Android) productivity app designed to utilize pose detection models to provide automated exercise form feedback (React Native, Firebase)

ACHIEVEMENTS

Eagle Scout - 2013

Dean's List - 2015/2016
